

DPEG Task Manager – Employee Quick Start Guide

Use the ****Tasks**** page to receive work, assign work, communicate, submit proof, and review completed tasks.

My Tasks

This section contains tasks that someone assigned to you.

1. Select the person's name to see their tasks.
2. Select a task to view its details.
3. Change ****Assigned**** to ****In Progress**** when you begin working.
4. Use ****Messages**** if you have a question or need to provide an update.
5. When the work is finished, select ****Submit Proof****.

Indicators beside a task tell you when you have a new message, reminder, or requested change.

Assigned by Me

This section contains tasks you assigned to other employees.

1. Select the employee's name to see their tasks.
2. Use ****Messages**** to ask a question or provide instructions.
3. Use ****Remind**** to send a simple reminder without writing a message.
4. When proof is submitted, select ****View Proof****.
5. Approve acceptable proof or request changes when more work is required.

Messages

Each task has one shared conversation between the assignor and assignee.

- Use Messages for questions, instructions, updates, or explanations.
- New activity displays ****1 unread****.
- Opening Messages marks the conversation as read.
- Type your message in the box at the bottom, then select ****Send****.

Keep all discussion about a task inside that task's Messages conversation.

> ****When sending a message:**** Select ****Send**** once and wait until your message appears in the conversation before sending another message. Do not double-click Send. If another person is actively replying, allow their message to appear before continuing.

Submit Proof

Submit proof only after completing the task.

1. Select ****Submit Proof****.
2. Describe what was completed.
3. Attach supporting files, photographs, or documents when needed.
4. Select ****Submit Proof**** once.

After submission, the form closes and displays ****Proof sent****. Use Messages for any additional information. If changes are requested, select ****Resubmit Proof**** after correcting the work.

Reminder

Reminder is a quick nudge from the person who assigned the task.

- The assignor can select ****Remind**** more than once when necessary.
- The assignee sees the reminder count beside the affected task.
- A reminder does not replace a detailed message. Use Messages when an explanation is needed.

History

History contains completed and cancelled tasks.

- History is for reference only.
- It shows whether proof was submitted, the number of messages, and reminder history.
- Historical labels are not actions and cannot be changed.

Remember

- ****My Tasks**** = work I need to complete.
- ****Assigned by Me**** = work I gave to someone else.
- ****Messages**** = questions, instructions, and updates.
- ****Submit Proof**** = evidence that the work is complete.
- ****Reminder**** = a quick nudge.
- ****History**** = completed or cancelled records.

If something does not work, take a screenshot and report the task name, approximate time, and whether you were using a phone or computer.
